

Afaq khan

Passport: EL4169771 | **Date of birth:** 16/12/2004 | **Place of birth:** peshawar, Pakistan |
Nationality: Pakistani | **Gender:** Male | **Phone number:** (+92) 3369803732 (Mobile) |
Email address: afaqii278@gamil.com | **LinkedIn:** www.linkedin.com/in/afaq-khan-066aba348 |
Address: Tehsil pabbi ,district Nowshera , peshawar kpk ,pakistan, 24210,
peshawar, Pakistan (Home)

ABOUT ME

Throughout my academic journey, I have maintained a strong focus on **Software engineering , Algorithm Design, Machine Learning** . These studies have provided me with a robust theoretical foundation that I have actively translated into practice through various projects. For instance, I recently developed **AWS s3 file monitoring system, with MERN satck**, where I utilize **AWS sevicees , react , node , python , Postgresql** to solve security threats at enterprise level ..Engaged with many National organization for volunteer work like Blood donations.Have command in Social activities and extra-curricular activities like Debating and working online on fiver and frreelancing.

WORK EXPERIENCE

INDEPENDENT AWS SOLUTION ARCHITECT ASSOCIATE – FIVERR AND INSTAGRAM – 05/05/2024 – Current – PESHAWAR, PAKISTAN

Deliver tailored AWS cloud architecture consulting to clients on a project basis. Engage directly with stakeholders to assess needs, design solution blueprints (emphasizing compute, storage, networking, and security), and advise on deployment strategies. Facilitate clients' cloud adoption by providing expert recommendations for performance optimization, cost management, and operational excellence on the AWS platform.

EDUCATION AND TRAINING

11/09/2022 – CURRENT peshawar, Pakistan

BACHELOR IN COMPUTER SCIENCE University of Peshawar

cgpa : 3.11/4.0

Address university town peshawar, 25510, peshawar, Pakistan | **Website** <https://uop.edu.pk/> | **Field of study** Computer Science |

Final grade A+

08/09/2020 – 25/06/2022 peshawar, Pakistan

F.SC HIGHER SECONDARY EDUCATION Islamia College Peshawar

Scored:899/1100

Address tehsil pabbi,district Nowhsera _ , 24210, peshawar, Pakistan | **Website** www.icp.edu.com |

Field of study Pre Computer Science | **Final grade** A+

LANGUAGE SKILLS

Mother tongue(s): **URDU**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	B2	B2	B2	B2

● SKILLS

Microsoft Office | Microsoft Word | Motivated | Decision-making | Team-work oriented

Devops skills

CICD Tools (Jenkins/Gitlab CI) | AWS Docker Kubernetes Jenkins | Terraform, AWS, Microservices architecture, CI/CD
Php and MySQL , GraphQL | Splunk, AWS cloud watch, Prometheus, Grafana, Nagios, Wireshark, Zabbix | AWS -
Lambda, ECS, EKS, S3, API Gateway, Serverless

Other Technical skills

Basics of Data Science, ML, NLP | Java (computer programming) | Experienced with Python, C, C++, C# , Java, Matlab,
Opencv, Tensorflow, Torch | CSS & HTML

● VOLUNTEERING

09/08/2022 – CURRENT

Regional Blood Center Peshawar

● CERTIFICATIONS

huawei , 10/11/2025

Huawei developer certificate

Successfully completed the Huawei Cloud Essentials certification, a program that equipped me with a robust conceptual understanding of cloud service models (IaaS, PaaS, SaaS), deployment strategies, and fundamental cloud security. This credential underscores my proactive initiative in building a formal, vendor-neutral knowledge base in cloud technologies, providing a strong foundation for advanced research and study in computer science or information systems.

Mode of learning: Project based

hp, 15/04/2025

introduction to AI

Earned HP's certification in Artificial Intelligence fundamentals, gaining a clear overview of AI technologies, their development lifecycle, and real-world implementation strategies. The program equipped me with the critical framework to understand how intelligent systems are designed and deployed, demonstrating proactive engagement with one of the most pivotal domains in modern technology.

Mode of learning: Online

Link <https://www.hp.com/>

Corvit System Peshawar , 10/08/2025

AWS Solution Architect Associate

Holder of the AWS Certified Solutions Architect – Associate certification, demonstrating validated expertise in architecting distributed systems on AWS. The intensive preparation provided a strong blend of theoretical knowledge and applied skills in cloud infrastructure design, ensuring solutions are scalable, fault-tolerant, and leverage AWS services effectively.

Mode of learning: Presential

● PROJECTS

05/09/2025 – CURRENT

AWS S3 File Monitoring System

Built a serverless application to enhance AWS S3 security through real-time anomaly detection and automated compliance checks. The solution processes S3 events using **AWS Lambda** and **Step Functions** to identify security risks like bucket exposure, disabled logging, or non-compliant object uploads. By implementing automated alerts and integrating with **AWS Security Hub**, the system provides centralized visibility and actionable intelligence, effectively reducing the mean time to detection (MTTD) for potential security incidents. The architecture showcases **event-driven design, security automation, and cloud-native tooling** to safeguard sensitive data.

07/08/2025 – 13/09/2025

Serverless Image Moderation & Processing Pipeline on AWS

- Engineered a scalable, event-driven pipeline to automatically moderate, process, and catalog user-uploaded images, eliminating manual review and ensuring content compliance.
-
- Architected using **AWS S3** to trigger processing workflows, **AWS Lambda (Python)** for serverless compute, and **Amazon Rekognition** for AI-powered detection of inappropriate content. Integrated **Amazon SNS/SQS** for decoupled communication and fail-safe handling of flagged images.
-
- Implemented automated processing using **Lambda** to generate standardized thumbnails and watermarks via the **Pillow library**, storing optimized versions in a separate S3 bucket. **Amazon DynamoDB** was used to maintain a searchable metadata catalog (upload timestamp, moderation status, user ID, S3 pointers).
-
- The solution **reduced manual moderation workload by an estimated 90%**, enforced content policy in real-time, and **decreased image storage costs by 40%** through lifecycle policies that archive originals to **Amazon S3 Glacier**. It provides a secure, auditable, and cost-efficient content management foundation.
